

# **COMPANY OVERVIEW**

Established in the 1980's within the UK's Sir Robert McAlpine engineering and construction group, today, RES (Renewable Energy Systems) is the world's largest independent renewable energy company, with the expertise to develop, construct and operate projects around the globe. Headquartered in the UK, it operates globally with offices in 10 countries across the Americas, Europe and Asia Pacific.

We've developed or built over 17GW of renewable generation over the last 38 years.

## **SERVICES**

### **DEVELOPMENT**

We can manage the entire development process - from initial site selection to all legal and commercial agreements.

### **CONSTRUCTION**

Our engineering, procurement, and construction teams seamlessly and safely co-ordinate projects of outstanding quality.

### **OPERATIONS**

RES proactively manage operational assets from our 24/7 control centre. Maximising output whilst ensuring full compliance.

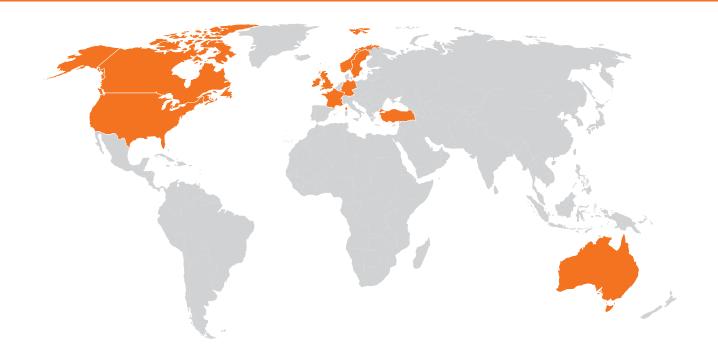

RES has been developing renewable energy in Australia since 2004. We develop wind and solar farms and battery storage projects that generate pollution free electricity, contribute to a cleaner environment and have a positive economic effect on their local communities. We also manage both the construction and operations of both RES' and third party projects.

In Australia RES has installed over 850MW (megawatts) of renewable energy and has a construction and asset management portfolio of 1GW. Recent projects include Taralga Wind Farm in NSW, Ararat Wind Farm in Victoria, Murra Warra Wind Farm in Victoria, Emerald Solar Farm in QLD and the construction management of Lal Lal Wind Farm in Victoria.

Our highly experienced energy teams are based in Sydney and Melbourne, and include specialists in developing, engineering, constructing, connecting and asset managing renewable energy projects. We have all the commercial and financial expertise needed to take a project from planning to completion.

Our vision is a future where everyone has access to affordable zero carbon energy.
